

# 06-01 Version Tracker

---

The Version Tracker ensures continuity and clarity as BrainFrame evolves across updates, user customisations, and system-wide upgrades.

It provides a transparent, modular way to understand:

- What changed
- Why it changed
- When it changed
- Who contributed

## Core Elements

Each version log includes:

- **Version ID** (e.g. v1.3.2)
- **Date of Release**
- **Change Summary**
- **Affected Modules**
- **Contributor / Author**
- **Impact Notes** (e.g. backward compatible, requires user review, beta-only)

## Types of Changes

- 🌟 New Module or Capability
- 🔄 Updated Language / Framing
- ⚙️ System Logic or Flow Adjustments
- 🧪 Experimental / Beta Additions
- 🗑️ Deprecated or Removed Elements

## Example

Version Date	Summary	Modules Affected	Notes
--------------	---------	------------------	-------

Version	Date	Summary	Modules Affected	Notes
v1.3.2	2025-03-20	Added Spectrums to SelfFrame	SelfFrame, Prompts	Optional update
v1.3.1	2025-02-10	Updated AI voice tone calibration	AI Config, PromptLib	No reset required
v1.3.0	2025-01-31	Beta test of Observer Mode	Reflection Engine	Opt-in only

### User Guidance

- Updates are non-destructive by default.
- Users can opt-in to new templates or keep legacy versions.
- Update prompts appear contextually (not randomly).

The Version Tracker is your map across evolution. **Because your system should grow with you — but never without you.**
